

TECHNICAL DATA SHEET

KEMAPOX AS STRIPE

Copper self-adhesive tape for electrical outlet in the anti-static floors

**PRODUCT DESCRIPTION**

Copper tape for antistatic floors. The consumption of the tape depends on the requirements of the project. In principle, the tape is mounted on each of 6 - 8 m to 1-2 m in the form of a grill. The strips must be connected properly by qualified electrician according to VDE regulations. The stipes must be installed under the primer conductive layer of KEMAPOX GRUND 2050 AS.

The tape is an integral part of KEMAPOX AS SYSTEM.

The installation is very easy, because one side is self - adhesive.

Field of use

For installation of antistatic floors on concrete and cement based screed in various industries.

Product properties

- A part of KEMAPOX AS SYSTEM
- Easy to use

INSTRUCTIONS FOR USE
