

HOLKER PROFILE

Profile for fillet weld

- ▶ Easy to use
- ▶ Small weight
- ▶ High tensile and compressive strength
- ▶ Slightly water absorption
- ▶ Dimension: 30 x 100 (150) mm

PRODUCT DESCRIPTION	Profile, made from quality PVC with very low relative density, used for preparation of durable, tightly and clean connection wall-floor (fillet weld), for example on balconies, terraces, in industrial objects, basement garages, as well into laboratories.
FIELD OF USE	Advantage the use of profile in opposite with classic making of fillet is accuracy and equability of joint wall-floor. HOLKER PROFILE can be over-pained with epoxy, polyurethane or acryl paint.
